## FOUR MARKS ARE BROKEN AND ANOTHER ONE IS TIED

Urbana Relay Team Is Disqualified After Taking Race in Record-Breaking Time—Hayes Runs 100 Yards in 9 7-10 Seconds.

OWA CITY, Iowa, June 3.-Illinois scored an overwhelming triumph in the Western Conference outdoor track and field championship meet today, piling up 59 6-14 points. Iowa was second with 34 1-35, Minnesota third with 23 1-10 and Notre Dame fourth with 22 13-14. Four nference records were broken and one was tied.

Illinois won the one mile relay in record-breaking time of 3.20, but was robbed of a victory in this event, due to the disqualification of the team because of Sweet's rough work. Sweet was alleged to have knocked Notre Dame runner over in making a turn. The race was given to lowa and no time announced.

Outside the relay the most notable leats were contributed in the 100-sard dash and high jump. Bill Hayes of Notre Dame ran the 100 in 97-10 of Notre Dame ran the 100 in 97-10 seconds, breaking a mark set eighteen years ago by G. A. Blair of Chicago. In the high jump Harold Osborne of Illinois and Johnny Murphy of Notre Dame broke the record, going into a tie for first place with leaps of 6 feet 51-16 inches. The former record of 6 feet 2% inches was established by Murphy a year ago.

Milton Angler of Illinois, holder of he American javelin record, won with a toss of 196 feet 11 inches, doffman of Michigan held the former conference record of 178 feet 4 inches. made a year ago. Lloyd Rathbun of Ames won the

TO SPUR ON GRIDMEN

Voting to stop "dates" with university men for four nights a week during the fbot ball season, girl students at Northwestern have put their shoulders squarely behind the drive to retrieve athletic defeats.

The 1,200 co-eds voted unanimously for the resolution, which is expected to discourage excessive "fussing" and to convert the "lounge lizards" into flery aspirants for a purple "N."

The resolution was proposed by Margaretta Fenn. president of the Women's League. It says: "Resolved, Thatt during foot ball season no girl shall go out on date with a university man on Monday, Tuesday, Thursday or Friday nights."

Elementary public school athletes meets that are to qualify contestants for the sixth annual track and field championship games held under the direction of the municipal playground department. Division meets this week will be held daily through Priday in Central High School stadium, and another is scheduled for June 12. The final will be held June 17.

Fifty-five schools have filed 1.200 entries for the divisional meets. The schedule follows: Monday, Blooming-didle-Virginia avenue; Tuesday, Garfield Park; Wednesday, New York avenue; Thursday, Rosedale; Friday, Georgetown; Monday (June 12), Columbia Heights. These meets will be called at 2:30 o'clock.

The events will be for eighty-five-pound, 115-pound and unlimited classes. For each class therewill be a sprint, high jump, broad jump, hop, step and jimp and relay race. Boys finishing first, second and third in the divisional meets will be eligible to compete in the city, final.

MOST VITAL TO ATHLETE

LONZO STAGG, the powerfully built little man who has coached at Chicago University for more than twenty years, coined an athletic truism recently which, according to the belief of many coment observers of things athletic who heard the phrase, is one of the set bits of athletic philosophy ever uttered. Stagg was asked to name at the considered to be the most vital or valuable trait in the truly great

In the vicinity of Annapolis fishing has been normal for the past week, including portions of the Chesapeake bay and Severn river. Large catches of hardheads continue, the prize being as great as are ever caught in those waters. It is reported that the best places for these fish at present seem to be in the Severn river rather than the bay, and as many as a hundred big fish are often caught in two or three hours by one fisherman.

Several good catches of rock, and some perch are reported, though most of the fishing is being done for hardheads. Peelers are being used almost petent observers of things athletic who heard the phrase, is one of the truest bits of athletic philosophy ever uttered. Stagg's audience began to reflect. It was recalled that Larry Erown ran the last fifty yards of his great half mile when the Penn team broke the world's record for the two-mile relay, as if he were in a trance. On almost every stride he stumbled and reeled and from the stands it looked as though he would collapse before he reached the tape. According to 'ally visible evidence Brown was physically through. Stagg believes that only his "capacity for nervous emotion," the ability to command hidden reserves of the spirit, kept him going on to finish that last, brilliant half in 1.54 and clinch a new world's record for his team.

come-back in the second round at Jersey City was recalled. Battered, beaten and crushed by the powerful first touch bldws of Dempsey, Carpentier, to the "wise ones" at the ring side, has soon for not more than a minute in the second round. Stagg believes that it was Carpentier's "capacity for nervous emotion" that brought him back in the second round to within a point of victory.

Stagg illustrated his point with the story of a Chicago halfback in a game played about ten years ago. This player weighed 149 pounds, but Stagg believed that he had to a marked degree "the capacity for nervous emotion." He was playing in a game when the score was tied with only five minutes to play. Chicago had the tall with ninety yards to go for a touchdown. Stagg ordered the Chicago quarterback to give the light halfback the ball on every play. On line bucks and end runs the halfback took the ball ninety yards in four minutes and won the game.

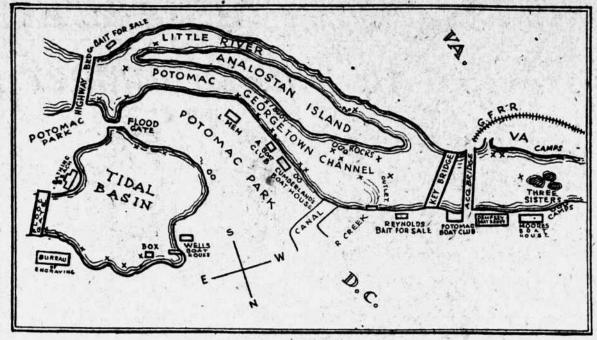

After the game Stagg took the woungster into the diessing room. He had to undress him. Io put on his street clothes for him. He had to take the player to his hotel. There he had to stay in the youngster's foom until 9 o'clock the next myrning, when the boy finally went to sleep. His "capacity for nervous emotion" had been so aroused during that desperate unnety-yard march down the field that he could not go back to normal until the following morning: That, according to the veteran Stagg, is the most necessary trait in an ather.

### **GUIDE FOR FISHERMEN**

POTOMAC, NEAR WASHINGTON—The Potomac is clearing rapidly. Bock, large and the pan size; catfish and carp are being caught. Balt used are bloodworms, crabs, minnows and cut herring. Live bait—smelt and mill roaches—can be purchased at several of the boathouses along the river front and at the west side of the Highway bridge on the Virginia side. Several of the local sporting goods stores also supply live bait for the bass fishing season, which opened May 30 in the District.

ANNAPOLIS (Severn river and bay)—Rock and perch reported in the Severn. Magothy and South rivers. Large catches of hardheads being made in the bay. Best fishing for hardheads at present is reported off Tolleys Reef, which is four miles below Annapolis and directly off Bay Ridge. Bloodworms and crabs are used as bait. Boats can be hired at any of the places around Annapolis for \$1.50 a day, per person, four or more in a boat. Distance, forty-two miles.

ESPITE the rain of Friday and yesterday the Potomac river is in ESPITE the rain of Friday and yesterday the Potomac river is in splendid condition for fishing. It is not clear, but rivermen assert that the fish bite best when the water is a little discolored, as at present. Of course, no one can tell just what the tributaries of the Potomac will bring down owing to the rains, but the river will be in splendid condition for anglers today, unless all signs fail. The salt-water fishing grounds are not affected by rain, with the possible exception of the Patuxent river, which usually gets cloudy following a heavy downpour. Followers of Izaak Walton will be pretty sure of a fair catch, no matter which direction they may decide to take, for their Sunday's outing. The fish are there, here and everywhere; all that is necessary is to go after them.

A remarkable feature of the hardheads this year is the uniform large size, many of those brought in from the deep water compare with shad in size. This fact is supported by Charles B.
